ABOUT ME

Software Engineer with 5 years of hands-on experience in front-end and back-end development. Interested in startups that create awesome products.

EXPERIENCE

Product Engineer

Paisanos

Argentina

2026 - Present

Senior Software Engineer

Accenture

Argentina

2021 - 2026

- Refactored the back-end architecture of the API by implementing modular file structures and reusable functions; achieved a 30% improvement in response time while ensuring maintainability for 3+ developers.
- Architected a back-end solution for an AI chatbot that conducted automated security audits on source code, leading to a 20% reduction in identified vulnerabilities and improving security protocols.
- Transformed the database management interface by designing a visually appealing layout and incorporating advanced filtering capabilities, enhancing overall productivity across the team.
- Executed a comprehensive review of API query structures, implementing best practices that led to a 20% enhancement in response times, enabling faster data processing for the chatbot utilized by 800+ technical users.
- Mentored two summer interns through onboarding, guiding the implementation of new API endpoints using OpenAI API.
- Developed an innovative platform that coordinated security solutions for 150+ web applications, improving incident response times by 40% and enhancing overall system reliability during high-traffic events.
- Created an intuitive front-end using NextJS and TailwindCSS, which improved the app's usability score on user feedback surveys, receiving a 90% satisfaction rate in the first quarter post-launch.

SKILLS

Skills: React, Redux, React Native, Next.js, Typescript, JavaScript, Python, Node, Express, SQL, and Sequelize.

PROJECTS

Museo Granate

2025 - Present

Built and led the development of museogranate.clublanus.com, designing a scalable, serverless architecture (Vercel) to manage 4,000+ matches and 1,500+ players, including REST APIs, data pipelines, and complex data modeling, with full-stack deployment (frontend, backend, database on Neon, and media storage via Vercel Blob), serving 10,000+ monthly users.

AI Chatbot

2025 - Present

Developed "Ramonín", an AI-powered assistant handling 6,000+ monthly conversations, providing instant responses by designing conversational flows and building custom APIs and AI actions from scratch, including a text-to-SQL integration with Museo Granate, significantly improving user experience and operational scalability.
